wordpress is still the best?

By JAMIE | Published: OCTOBER 25, 2009

I guess.

I think that this becomes unobtrusively and opportunistically obvious that this wordpress works best.

But then again, i am comparing. I am not simply complaining. I just know what i love and what i love loves me. I am complaining purposefully, and with an understanding of an expectable out come. the outcome is dramatically familiar to every iteration of previous outcomes. This complaint has no expectations of an outcome.

sometimes it helps to use scientistspeak. because sometimes nothing seems to rhyme, or be on time. this is scientistspeak.

PUBLISHING POSTS INTO A NEW CATEGORY.

this creates an entire organization system that works better than developing an entire framework on your own. It is much less egotistical to simply find out how to fit into this framework, and learn to love what it provides. I enjoy experts in real systems more than experts in fantastically almost created ones.

SO WORDPRESS FOR EXPRESSION? YES.

remember that we are living in a world of entrepreneurs. everyone will become an evangelist of themselves. people make up new religions every day. That is our world. today, we are in a brand new world. there are as many people being born in one day as there have ever been alive in human existence (source?) so it is a brand new world. every moment. look around you, there are more opportunities for diversities than ever before. never before have we seen such amazing human potential. my

plan is to get right into the middle of it. I am aware of every implication and i am looking to lead by my own example. I never realized how difficult it could become after seeing the examples i had seen. military people learned everyday, how to lead. There is structure and discipline and everyday is an opportunity to be alive. That is the love story that i learned from the military.

Yes! Wordpress will allow you to organize all of your content – after the last passage, you, dear reader will understand that i can categorize this post as military, or idigress or something else that communicates its annoying playfulness. This serves as a warning and an expectation for people that like to think that engineers design things. That is like saying accountants run businesses. These businesses can run themselves, as long as the simplest ideas are kept in place. structure. now things are starting to look like the military.

organization! somehow i can demonstrate some form of organizational input and output. images help to tell the story. That means that this machine needs a way to put things in and take things out in order to operate with any form of efficiency.

THE MORE I TALK, THE LESS I FEEL EFFICIENT.

I could say that from the perspective of seeing the innerworkings of an educational institution. My perspective has been looking for solutions to everything that keeps us from each other. I have found amazing things in my research. At the same time, they are mundane. In fact they are obvious to the point of annoying. We hold the key to our undoing, so we should enjoy our own undoing. This is the undoing that we are here to do on our own anyway.
